

PREPARING YOUR INSEMINATION (IUI)

Pa	tient's name:			
*	 Date (two days before your insemination): / / Stop taking your hormones such as Gonal F, Puregon, Menopur, Repronex, Luveris, etc. Avoid sexual intercourse 2 days prior your insemination. 			
	• Make sure to ha	Ovidrel hCG	250 ug 10 000 IU	 Only once. The time will be determined by a nurse. Time: Only once. The time will be determined by a nurse. Time:
*	 Date (the day before your insemination)://////			
	Date (the day of you	ır insemina	tion) :	/ / Time:

- Plan to arrive at the clinic one hour before your scheduled insemination time.
- Your partner will be asked to provide his semen specimen upon arrival. It will take about 45 to 90 minutes to prepare semen specimen for your insemination.
- Once the insemination is completed, you may leave immediately, you don't need to rest or lie down.
- Please make an appointment for a pregnancy blood test to be performed on the 16th day after your insemination.
